

# omega

charge management system

## Manage your fleet charging all in one place

Our fleet-first charge management software automates charging when energy costs are lowest, dynamically responding to your evolving needs each shift. It also comes with a 99.9% uptime guarantee, so you can rely on Omega to always be there to keep your fleet running smoothly.

### Connected & technology-agnostic

Integrations with EV chargers, fleet management, telematics, and more.

### Out of the box & future proofed

Ready to deploy today and built to evolve with your needs.

### Adaptive & automated load management

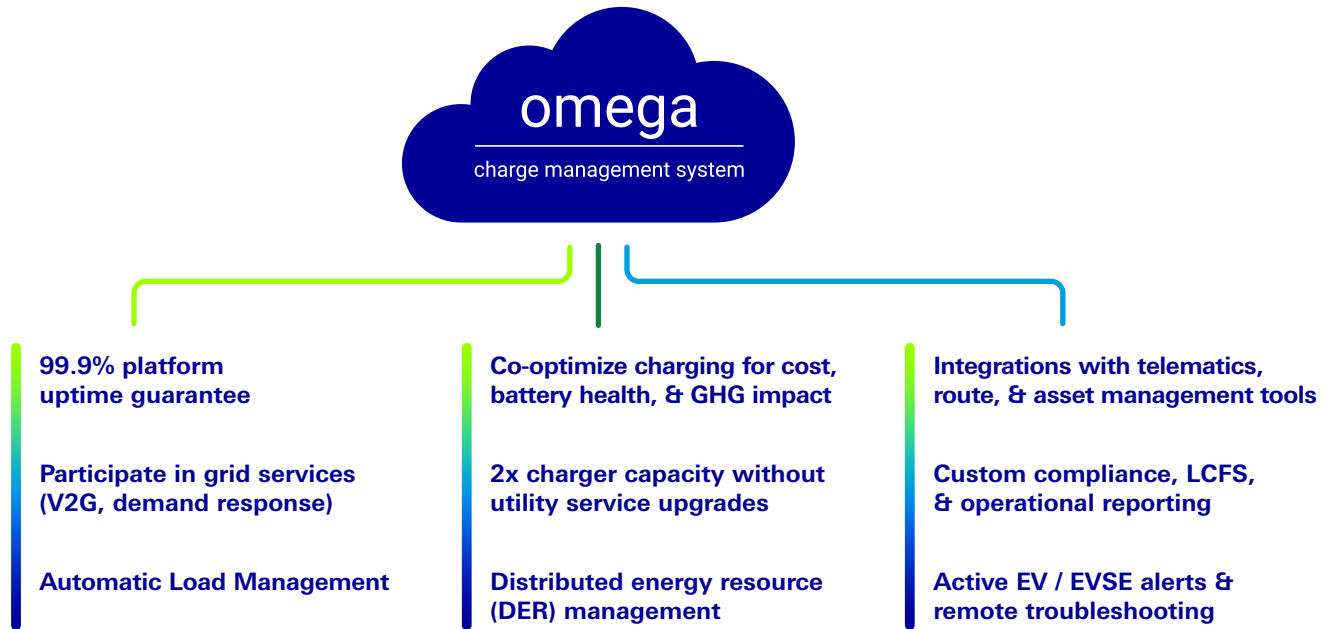

Delivers cost-optimized energy while respecting operational constraints.

“They helped us pinpoint the financial, operational, and equipment improvements we could make to realize 40 percent savings and ensure uptime for our riders who depend on our bus service to go about their daily lives. As we expand our EV fleet, we look forward to realizing even greater savings.”

# You're in the driver's seat with Omega Command Center

Our Omega Command Center is your user-friendly dashboard that functions as a 24/7 network operations center, providing real-time visibility to your EVs, EVSEs, power usage, and more. It can be viewed from any web browser and is optimized for mobile devices to allow you and your team to manage your EV fleet on the go.

- |  |   |  |  |
|--|---|--|--|
|  | Maximize electric vehicle uptime  |  | Follow each vehicle's state-of-charge (SOC) and time-to-completion charging estimates.               |
|  | Oversee all EV charging stations and vehicles in real-time  |  | Track current and maximum electrical capacity at your fleet depot                                    |
|  | Monitor vehicles out on routes and track their expected state-of-charge when they return to the depot |  | Easily run savings, energy, equipment health, GHG emission reductions, and other operational reports |
|  | Receive alerts and notifications in real-time   |  | Manage and monitor multiple depots all in one place  |
