

## Cooperative Purchasing

### Simplify EV charging procurement with Purchasing Cooperative of America

For government, education and non-profit organizations, procuring EV charging equipment can involve lengthy RFP processes, delaying the benefits of fleet electrification. Our partnership with Purchasing Cooperative of America (PCA) simplifies this process, allowing you to purchase our Omega charge management software and EV charging hardware faster.

PCA maintains rigorous selection processes and competitive bid evaluations, ensuring contracted suppliers meet high quality standards and giving you peace of mind. You'll also benefit from cooperative purchasing power, lowering your total cost of ownership.

### Omega charge management software

Our cloud-based software automates charging when energy costs are lowest and sends you real-time critical alerts from one dashboard. It comes with a 99.9% platform uptime guarantee, so you can rely on Omega to keep your fleet running smoothly. With Omega, your fleet can:

**Reduce  
electricity costs**

**Stay in control of  
fleet performance**

**Fix problems fast to  
avoid downtime**

## EV charging bundles

Our bundles combine hardware and Omega charge management software in one solution for faster and smarter deployment. With a two-year parts warranty included, your fleet is covered if there's ever an equipment issue. Choose from a range of hardware options, also available to purchase separately:

### Level 2 AC chargers

Available in a wall mounted or single / dual pedestal structure, ideal for fleets looking to get started with permanent charging infrastructure.

### DC fast chargers

Mobile charger bundle for faster EV charging without costly site modifications, with wall mount and pedestal options available for separate purchase.

### Key benefits

PCA membership is free. Become a member to purchase using a PCA contract by completing the online member registration at [pcamerica.org/members](https://pcamerica.org/members)

**Faster procurement** - Working with us via PCA means you can avoid your own lengthy RFP process, helping you to electrify your fleet faster and stay focused on business operations.

**Competitive pricing** - as a PCA member, you'll benefit from pricing discounts on our products by leveraging economies of scale, lowering your total cost of ownership.

**Solutions that fit your fleet needs** - We offer a range of EV charging options via PCA, accounting for operational constraints. Our Omega charge management software integrates with any telematics or fleet management tool, avoiding disruption to operations and making it easier to add more chargers in future.

**Trusted partnership** - PCA's rigorous selection processes and high quality standards for all contracted suppliers gives you added peace of mind on the reliability of our services.
