

Bundled EV charging hardware and software

One solution for faster and smarter EVSE deployment

Sourcing EV charging assets from multiple suppliers leads to slower deployment, integration challenges and charging that is not optimized, delaying the benefits of fleet electrification.

To solve for these challenges, we've combined charging infrastructure with a two-year parts warranty and license for our Omega charge management software. With one partner for your charging needs, your EVSE will arrive faster and ready to go, so you can focus on business operations.

Hardware solutions

We offer a range of hardware to best fit your fleet needs. All options come pre-configured with Omega, our charge management software that simplifies EV charging operations. All versions also include a cable management system to keep wires organized and ensure safety.

Level 2 AC charger

Available in a wall mounted or single / dual pedestal structure, ideal for fleets looking to get started with permanent charging infrastructure.

DC fast charger

Get faster EV charging, available as a wall mount, single / dual pedestal or mobile charger solution to avoid costly site modifications.

Omega charge management software

Our cloud-based software simplifies the charging process and sends you real-time critical alerts from one dashboard. It comes with 99.9% platform uptime, so you can rely on Omega to keep your fleet running smoothly. This helps your fleet to:

Reduce electricity costs

Stay in control of fleet performance

Maximize vehicle uptime

Why bundle with us

Smarter EV charging - Omega charge management software, included with our hardware, simplifies the charging process. You'll spend less time managing charging and more time focusing on business, while reducing energy costs.

Faster deployment - partnering with us for both hardware and software means we can expedite deployment, avoiding the long lead times of multiple suppliers. Once installed, your chargers will auto-connect to Omega, so you can start optimizing charging immediately.

Solutions that fit your fleet needs - we offer a range of EVSE options, accounting for operational constraints. Omega Core also integrates with any telematics or fleet management tool, avoiding disruption to operations and making it easier to add more chargers in future.

Prolonged equipment lifespan - with a two-year parts warranty included, your fleet is covered if there's ever an issue with your equipment, avoiding unexpected costs. We'll handle any replacements end-to-end, giving you peace of mind.

Let's electrify together
