

# EV charger hosting for Real Estate

Attract customers and receive rental revenue with our fast, reliable EV chargers

More drivers are going electric, with over a million EVs on the road in the US today. Host a charger with bp pulse and let us help you attract customers by providing fast, reliable EV charging at your location.

You'll become part of a fast-growing public charging network, increasing footfall at your site while we pay you a competitive rental or hosting fee. With installation and maintenance costs covered, there's no upfront investment required. You can receive revenue while offering the services your customers need.

## Our US network ambitions

We aim to build the world's leading EV charging business, backed by the following commitments:

Fast, convenient, and reliable charging network

\$1B

\$1bn US investment in EV charging by 2030, with \$500m deployed through 2025

100,000 global charge points target by 2030, with 3,000 in the US by 2025

## How it works

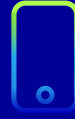

### Reliable charging hardware

We source DC fast charging hardware from a range of suppliers, including Tesla.

### Fully funded installation

We cover all charger-related installation and maintenance and provide 24/7 real-time monitoring and support.

### Seamless digital experience

Our app enables drivers to find your location on our public network and provides a seamless charging experience.

### Competitive rental revenue

You'll receive a competitive rental or hosting fee for hosting our chargers at your site.

## Why host EV charging with bp pulse

**Global expertise** - with over 29,000 charging points worldwide, our teams can efficiently deploy at scale.

**Hundred year head start** - with over 100 years' expertise in energy and operating convenience store brands, we can create exceptional charging experiences.

**Fast-growing network** - with a \$1bn US investment target by 2030, and our existing footprint of gas stations and TravelCenters of America sites where we plan to install chargers, our network is growing.

**Our collaborations** - our global relationships with companies like Uber and Hertz help us make data-driven operational decisions.

**Customer driven** - we have +10 million daily touchpoints at our gas stations and prioritize network uptime.
