

EV charging bundle with Tesla hardware

One solution for faster and smarter EV fleet charging

Sourcing EV charging assets presents new challenges for fleets, with slow charging speeds, integration issues and charging that is not optimized delaying the benefits of electrification.

We've combined ultra-fast Tesla chargers with a two-year parts warranty and license for our Omega charge management software for faster, more reliable EV charging. Your EVSE will arrive pre-configured and ready to go, so you can maximize vehicle uptime and stay focused on operations.

What's included

Ultra-fast Tesla hardware

We're the first charging provider with the ability to deploy best-in-class Tesla chargers. You'll benefit from faster, more reliable EV fleet charging to maximize vehicle uptime. Each bundle includes 4 posts to charge multiple vehicles simultaneously.

Omega charge management software

Our cloud-based software simplifies the charging process and sends you real-time critical alerts from one dashboard. It comes with 99.9% platform uptime, so you can rely on Omega to keep your fleet running smoothly. This helps your fleet to:

Reduce electricity costs

Stay in control of fleet performance

Maximize vehicle uptime

Warranty

With a two-year parts warranty, your fleet is covered if there's ever an equipment issue, avoiding unexpected costs and prolonging your equipment lifespan. For added peace of mind, upgrade to our additional service plan to extend your coverage to labor warranty and preventative maintenance, backed by an uptime guarantee.

Key benefits

Smarter EV charging - with Omega charge management software, you'll spend less time managing charging and more time focusing on business, while reducing energy costs. Once installed, your chargers will auto-connect to Omega to optimize charging from the start.

Faster EV charging - using ultra-fast Tesla chargers means you can charge your EVs quicker with reliable charging hardware, maximizing vehicle time on the road and ensuring uptime.

Solutions that fit your fleet needs - Tesla's chargers are both CCS and NACS compatible, so all EV models in your fleet can benefit from faster, more reliable charging. Omega Core also integrates with any telematics or fleet management tool, avoiding disruption to operations.

Best-in-class expertise - best-in-class Tesla technology combined with bp's long and evolving history in energy means you can rest assured that your EV charging strategy is in expert hands.

Let's electrify together
